MEMORANDUM FOR: Chief, Manufacturing and Services Division, ORR

ATTENTION :

FROM :

Chief, CIA/PID (NPIC)

SUBJECT :

Huang-shih Cement Plant, Communist China

REFERENCES :

- (1) ORR Requirement No. C-RR3-80,417
- (2) CIA/NPIC Project No. C 1040/63

1. This memorandum is in answer to the above referenced requirement which requests analysis and illustrations concerning the operational status of the cement plant located near Huang-shih, Communist China.

2. An enlargement (CIA/PID/IB-P-478/63) of the cement plant at Huang-shih has been enclosed. At the time of photography both kilns in this plant were in operation since smoke was being emitted by both of the plant's stacks. In addition, a ten or eleven car train is located at the finished product end of the plant. A wet process is used at this cement plant and all but one of the eight slurry tanks are full. An active limestone quarry is located about  $\frac{1}{2}$  mile NW of the plant. This limestone is probably brought to the plant by truck.

3. The analyst on this project was [redacted] who may be contacted [redacted] should you have any further questions concerning this project.
